Affirm a Flower™

These cards unite exquisite images of the flowers with transformational soul words. They are a vital tool for selecting flower essences and for enhancing the therapeutic process while taking them.

Affirmations are a specialized activity within the larger field of soul processes such as meditation, contemplation and prayer. It is a tenet of all spiritual teachings, as well as business and professional training programs, that the ordering of thought and the harmonizing of feeling have a powerful impact on our ability to manifest change, both within ourselves and within the world.
